

## Flight Torch LED

**Product Categories:** [DENTAL LIGHTS](#)

**Product Page:** <http://flightdentalsystems.com/product/flight-torch-led/>

### Product Summary

The Flight Torch LED uses some of the most advanced LED technology in the industry to create a superior entry level LED light for the dental operator. The LED light uses 4 individual LED lights reflected off a small reflected surface with more than 100 facets to create a clear, bright and color corrected light pattern. The light pattern is very defined with limited shadowing to prevent the light from getting into the patients eyes causing discomfort or irritation.
